HIGH TEMPERATURE COMPOSITES MARKETS WORTH IN EXCESS OF \$2 BILLION BY 2019

Extreme Environment Materials Solutions (EEMS), LLC is well positioned with our product offerings to support present and future customer efforts to develop materials solutions in a number of major markets; Aerospace / Defense, Transportation and Demanding Industrial Applications.

Energy efficiency, reduced operating costs, regulatory compliance and lessened environmental impact are some of the major customer objectives that EEMS's products are able to address.

Our ceramic forming polymers and other high temperature materials impart improved performance at lower cost of ownership. Having been in business since 2010 we know companies continue to look for ways to run hotter, reduce weight, run faster while minimizing wear and corrosion; objectives that can be achieved with advance ceramic material solutions.

We encourage you to contact us to learn how we might help you capture the benefits of new future materials solutions today !
